How to Prioritize Metrics

Not every metric deserves equal attention. High-performing Customer Success teams focus on a balanced scorecard that reflects customer outcomes, operational efficiency, financial performance, and long-term growth.

A practical approach is to group metrics into four questions:

Are customers successful?

- Health Score
- Adoption
- Business Outcomes
- CSAT
- NPS

Are customers staying?

- Retention Rate
- Churn Rate
- Renewal Rate

- NRR

- GRR

Are customers growing?

- Expansion Revenue

- Upsell Rate

- Cross-Sell Rate

- Multi-Product Adoption

- Seat Growth

Is the Customer Success organization operating efficiently?

- Forecast Accuracy

- SLA Compliance

- Accounts per CSM

- Success Plan Completion

- Workflow Automation

Organizations that consistently monitor these dimensions gain a comprehensive view of customer performance, enabling proactive decision-making and sustainable business growth rather than reacting only after problems emerge.
